PROFESSIONAL SUMMARY

Detail-oriented and results-driven Computer Engineering student with a solid foundation in mobile and full-stack software development, RESTful API integration, and technical project management. Experienced in translating complex UI/UX designs into production-ready, functional code and engineering cross-platform solutions. Eager to leverage technical expertise, programming skills, and an engineering mindset to develop innovative solutions.

TECHNICAL SKILLS

Frontend & Mobile Development

- **Frameworks:** Flutter (Dart), JavaScript (ES6+), HTML5, CSS3, React.js
- **UI/UX:** Figma Design-to-Code translation

Backend & Core Programming

- **Languages:** Python, Node.js, Express.js, Java, C, C#
- **Core:** RESTful APIs & Data Integration, Object-Oriented Programming (OOP), JWT Authentication

Databases & Cloud Backends

- **NoSQL:** MongoDB / Mongoose, Firestore
- **SQL:** MySQL / PostgreSQL
- **BaaS Platforms:** Firebase, Supabase

Tools & Platforms

- Visual Studio Code / Android Studio
- Git / GitHub
- Figma
- Google Workspace / Microsoft Office
- Vercel

PROJECT EXPERIENCE

UnliRice (Collaborative Software Development Project) | GitHub Link

Frontend Developer

- Collaborated in a development team to design and build a full-stack web application, implementing core software engineering principles and agile development workflows.
- Contributed to frontend interface design and backend logic to ensure seamless data flow and a user-friendly experience.

KART (Collaborative Web Project) | GitHub Link

Frontend Developer

- Integrated Figma UI/UX designs into functional, responsive code while optimizing application performance and state management.
- Worked within a development team to deliver smooth animations and cross-platform compatibility across the application interface.

Mini-Blog Website | GitHub Link

Full-stack Developer

- Designed, built, and deployed a responsive web application allowing users to seamlessly create, read, and manage blog posts.
- Handled routing, view rendering, and basic data persistence using HTML, CSS, and JavaScript to manage web workflows.

EXPERIENCE & LEADERSHIP

ICpEP.SE (Institute of Computer Engineers of the Philippines Student Edition)

Member – Research and Development Committee | 2025 – 2026

- Spearhead and deliver technical projects, fostering a culture of innovation and continuous technical learning among peers.
- Facilitate hands-on workshops and technical presentations to enhance student skills in programming and emerging technologies.
- Collaborate with cross-functional student teams to design, build, and test prototype solutions for organizational competitions.

RESEARCH AND INNOVATION COMMITTEE

Member | 2023 – 2025

- Led student-driven research initiatives aimed at promoting invention, technical excellence, and problem-solving within the campus community.
- Mentored and assisted peers in navigating project roadblocks to successfully achieve research goals.
- Actively participated in competitive tech events, workshops, and hackathons to benchmark organizational capabilities.

EDUCATION

CEBU INSTITUTE OF TECHNOLOGY – UNIVERSITY (CIT-U)

Bachelor of Science in Computer Engineering

ADDITIONAL INFORMATION

- Familiar with modern Agile software methodologies, git branch management, and cross-functional team collaboration.
- Comfortable utilizing AI-assisted developer productivity tools to accelerate coding workflows and script debugging.
- Deeply interested in full-stack web architectures, secure cloud engineering, and custom automation infrastructure.
